

Campus Track

Campus Management

Monitor activity, control privileges, keep a verifiable record of attendance, and create an electronic log to improve security.

Know who's been there—and where.

Whether your student population is large or small, chances are your campus is spread out. While it's impossible to know the whereabouts of every student on campus, you can manage traffic flow in and out of your facilities, and keep a record for your review if you ever need it.

Control starts with Campus Track™ Activity Tracking. Campus Track is a campus-wide activity tracking solution for the collegiate market, developed to meet the needs of colleges, universities and technical schools.

With Campus Track software, you can effortlessly track and authorize student access to:

- Academic facilities
- Recreational facilities
- Resource centers
- Events

Keeping track pays back

Campus Track can be configured to maintain data from multiple departments. It gives you campus-wide ability to manage student populations and promote better learning and recreational environments. With a PC or kiosk at any entranceway, you can:

- Keep labs from overcrowding by maximizing Check-in limits
- Ensure that students who are entering a facility are authorized to do so
- Control student access to assets, such as borrowed athletic or science equipment
- Let instructors know who's actually attending labs, classes and lectures for credits
- Provide attendance records to support funding for resource facilities
- Provide instant verification of who has paid an activity fee for entrance to an event
- Track event attendance for follow-up marketing

Campus Track™ Mobile Gives You More Options

Campus Track™ Mobile extends the functionality of Campus Track from your desktop PC to a portable handheld computer. This gives campus personnel the flexibility to track check-in and -out activity almost anywhere.

Using Campus Track Mobile, student information, including photos, student status and contact information can be easily displayed on the spot. The integrated bar code scanner allows fast attendance tracking at any event or location just by scanning the student's ID badge.

Campus Track Mobile is a powerful tool at college events both on and off campus. Student identity, status and authorization to attend the event along with arrival and departure can be viewed and entry tracked, improving security and accountability for everyone. An optional portable printer allows you to instantly issue an entrance receipt at check-in.

Fully featured for today's security needs:

- Simple installation and implementation
- Intuitive interface is also customizable. You can create your own drop-down lists to meet the specific needs of your institution or set your screen for automatic check-in to speed traffic flow.
- Handheld software works with the MC55a (Campus Track™ Mobile)
- Web Reports add-on feature allows you to run data reports from any location
- Works with various scanner technologies and POS systems
- Compatible with Windows 32 and 64bit systems
- Compatible with SQL 2005 & 2008
