DATACARD® ID WORKS® BASIC IDENTIFICATION SOFTWARE

Designed for traditional ID programs, ID Works Basic identification software provides everything you need to ensure easy, efficient program management.

Essential tools for card design, production and management

Datacard[®] ID Works[®] Basic identification software includes the core tools that ID programs need to manage card design and production efficiently, as well as excellent flexibility for creating cards and handling images. It also allows you to easily upgrade to Datacard[®] ID Works[®] Standard or Enterprise software as your needs change.

Proven capabilities, effective performance

- Powerful ID program management. This software package enables you to create card and report designs, as well as manage image capture and printing. It introduces basic security features, such as a ghost option for the photo field. You can import and export data from Microsoft[®] Access databases, encode magnetic stripes and print bar codes. You can also create your own layout, field labels, color and graphics in production forms.
- Flexible integration. The application leverages all the features of Datacard[®] SD Series or SP Plus Series card printers and integrates seamlessly with many other printer brands. It supports Datacard[®] Tru[™] Photo solutions, as well as TWAIN and Video for Windows image capture devices.
- **Intuitive interface.** The user-friendly interface features point-and-click navigation to simplify card design and production. Customizable sample templates and online documentation quickly turn new users into experts.

SOLUTIONS AND SUPPORT FROM A PROVEN PROVIDER

Only Datacard Group offers the hardware, software, supplies and service required to manage secure centralized and instant card issuance. We understand the consumer demands, security risks and other unique needs of both issuance models. For 40 years, financial card issuers around the world have trusted us to make card issuance fast, affordable and secure. The Datacard Secure Issuance Platform reflects this unmatched experience. You can also optimize your investment with our full line of professional services for planning, data migration, program start-up and ongoing technical support. We provide support in more than 120 countries.
