ISG™ Multi-Technology Readers & Credentials

A Truly Flexible Solution For All Your Security Needs

MIBP1500   MIBP2110   MIBP1100   MIBP2100

Multi-Technology Readers

ISG's multi-technology readers are the most flexible readers in the industry. Finally, one reader handles all applicable ISO standards (14443 and 15693). ISG's multi-technology readers contain both 125 kHz proximity and 13.56 MHz contactless smart card capability in one unit, which allows our customers to economically migrate to the latest in smart card technology at their own pace.

ISG's multi-technology readers provide capability with many other 125 kHz and 13.56 MHz technologies offered in the market today.

Dual-Technology Credentials

ISG's dual-technology credentials are the most flexible credentials in the industry. ISG's dual-technology credentials contain both 125 kHz proximity and 13.56 MHz contactless smart card capability in one unit.
