

People Track VM Visitor Management

Make sure everyone's
-Safe -Secure -Accountable

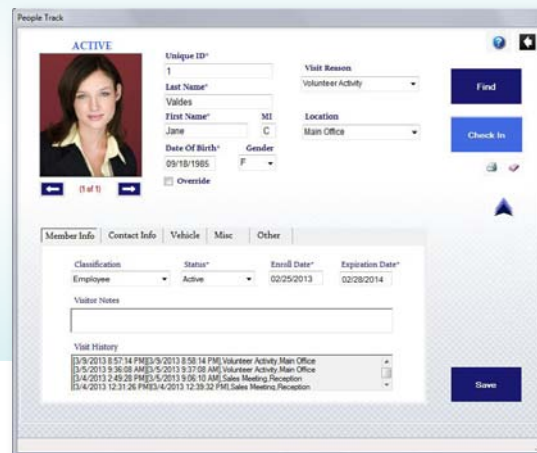

Tracking visitors, vendors and volunteers has never been more important or EASY.

Do you know everyone who enters and leaves your building, -when they arrived, -when they left -what they wanted? If required, could you look back on a day's, week's, or month's worth of data to determine exactly who entered your building, and why?

Now you can, NEW People Track VM (Visitor Management) represents Open Tech's most expansive product upgrade ever. People Track was always an easy-to-use visitor management solution, People Track VM is now even easier. It's simple to set up and an ideal replacement for any outdated log books or manual system you may be using now.

Even for the most inexperienced user, People Track software lets you quickly and easily:

- Scan and capture visitor information from driver's license, credit card or business card at check-in
- Instantly create a visitor badge with photo
- Run a background check
- Classify each visitor
- Catalog who's being visited
- Note reason for visit
- Close the visit at check-out
- Provide a complete visit history report

Fully featured for today's security needs:

- Activity and Visitor Tracking
- Background Checks
- Barcode, Magstripe and Biometric Scanning
- License and Business Card Scanning
- Customizable Fields
- Data Import and Export Options
- Label Printing
- Visitor Restriction/Security

- Hands-Free Usage
- Self Check In
- Dynamic Reports
- Programmable Checkout
- Access/SQL Database
- Workstation Security
- Automated Installation

All these features typically appear on applications costing twice as much or more.
